

For our Erfurt Airport location, we are looking to fill the following position:

■ Maintenance Planner (m/w)

Your Tasks

- Evaluating, planning and monitoring the execution of appointed work packages
- Evaluating work packages in respect of necessary manpower, materials, tools and feasibility according to the HAITEC Scope of Work
- Preparation of work packages according to the customer's requests
- Planning the necessary works according to ground times and existing processes
- Coordination of subcontractors
- Communication with the customer regarding technical planning questions
- Examination of current and appropriate airworthiness requirements (AMM, IPC, etc.) if provided by the customer
- Coordination of problem solutions in cooperation with customers and manufacturers
- Evaluation of already performed projects in order to realize improvement potentials and in order to increase productivity
- The employment will be in the offer, planning or task card evaluation team of the planning department depending of the necessity

Your Profile

- Successfully completed study in aviation or a completed training as certifying staff (CAT A, CAT B1 or CAT B2) with experience in line or base maintenance or a similar training and several years' experience in work planning and preparation
- Very good knowledge of aviation regulations (LTA, AD, etc.)
- Good knowledge of a manufacturer's aircraft and component documents such as MPD, MRB, AMM, SB, IPC, STC etc.
- Very good EDP and MRO software skills (e.g. in the maintenance software Wings)
- Good knowledge of written and spoken English for correspondence
- Confident decision-making and communication performance
- Readiness for team-oriented collaboration
- Great ability to work under pressure and flexibility
- A conscientious and proactive work approach

We look forward to receiving your complete application documentation – preferably by email – to jobs@haitec.aero including desired salary and possible start date.
